**The Editor-In-Chief,**  
Pakistan Journal of Statistics and Operation Research.

Dear Sir,

I would like to submit a manuscript entitled “**On some properties of Generalized Transmuted Kumaraswamy distribution**” proposed by Aliyu Ismail Ishaq, Abubakar Usman, Tasiu Musa and Samson Agboola to “Pakistan Journal of Statistics and Operation Research”, for possible evaluation.

In this research, we proposed an extension of Kumaraswamy distribution called Generalized Transmuted Kumaraswamy distribution (GTKw) distribution which extends the quadratic rank transmutation map pioneered by Shaw (2007) by adding two additional shape parameters to generate more flexible distributions based on Generalized Transmuted G- Family (GT-G family) proposed by Nofal *et al.*, (2017). Some of the properties of proposed distribution were studied.

I undertake that the above manuscript has not been published or accepted from any other publications.

Here are detail of each author:

Author(s) Order	Name of the author and e-mail ID	Affiliation
1	Aliyu Ismail Ishaq Email address: binishaq05@gmail.com	Ahmadu Bello University, Zaria, Nigeria
2	Abubakar Usman Email address: abubakarusman28@gmail.com	Ahmadu Bello University, Zaria, Nigeria
3	Tasiu Musa Email address: Mtasiu@abu.edu.ng	Ahmadu Bello University, Zaria, Nigeria
4	Samson Agboola Email address: abuagboola@gmail.com	Ahmadu Bello University, Zaria, Nigeria

Thank you very much for given attention to our paper and we hope that our paper will be considered.

Yours faithfully,

**Aliyu Ismail ISHAQ**
